

Ohio Oil & Gas Well Locator

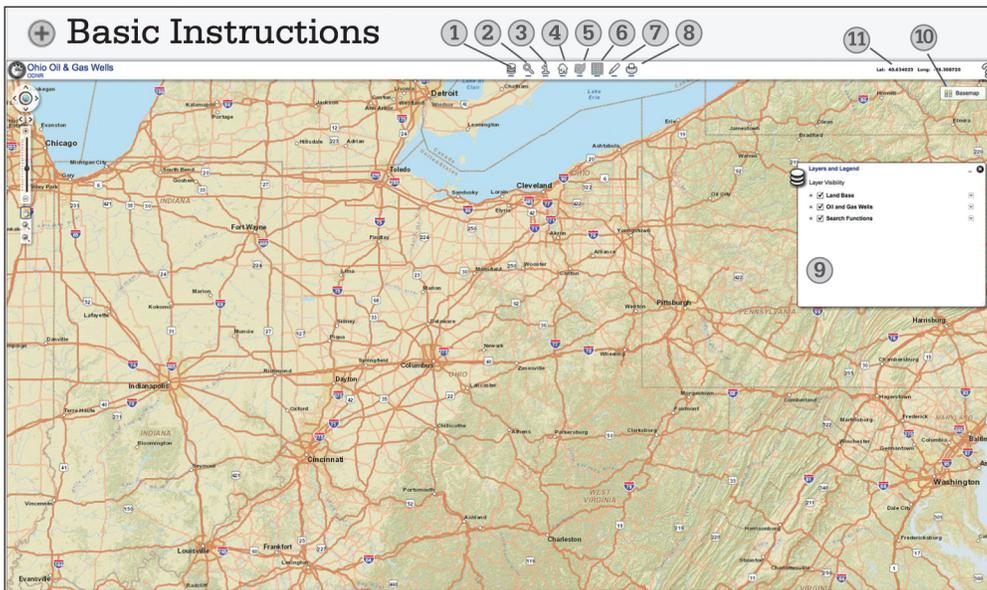

BASIC INSTRUCTIONS

The Ohio Oil & Gas Well Locator is an interactive map that allows users to search for Oil and Gas wells and related information in the state of Ohio. Below is a list of basic instructions for use of the locator that detail the options and types of searches available. In addition to linking through the Division of Oil and Gas website, the Oil and Gas Well Locator can be found at: <http://nrgisiisdev1/website/dog/oilgasviewer/index.html>.

1. BASIC INSTRUCTIONS

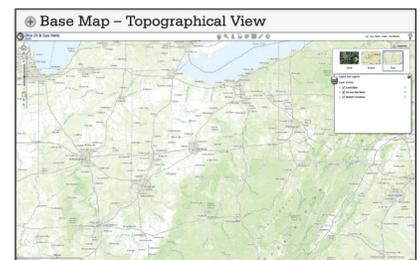

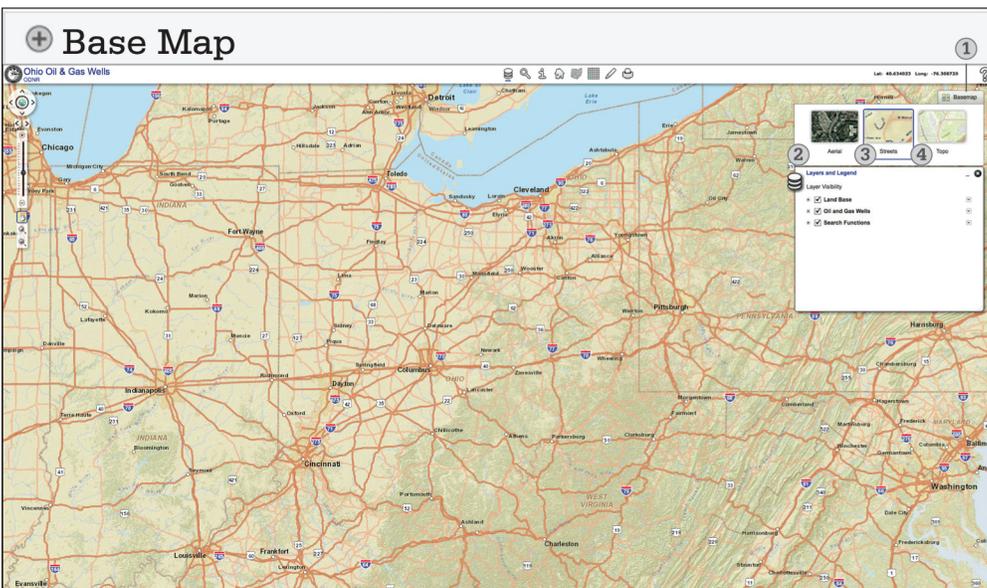

The Oil & Gas Well Viewer defaults to the following view when opened. Below are a list of icons and palettes that are visible at default.

- | | | | |
|---------------------|-----------------------------|-------------------|------------------------------|
| 1. Layers & Legends | 4. Find Address/Coordinates | 7. Draw & Measure | 10. Latitude/Longitude |
| 2. Well Search | 5. County Bookmarks | 8. Print | 11. Magnification Bar |
| 3. Identify | 6. Township Search | 9. Base Map | 12. Layers & Legends Palette |

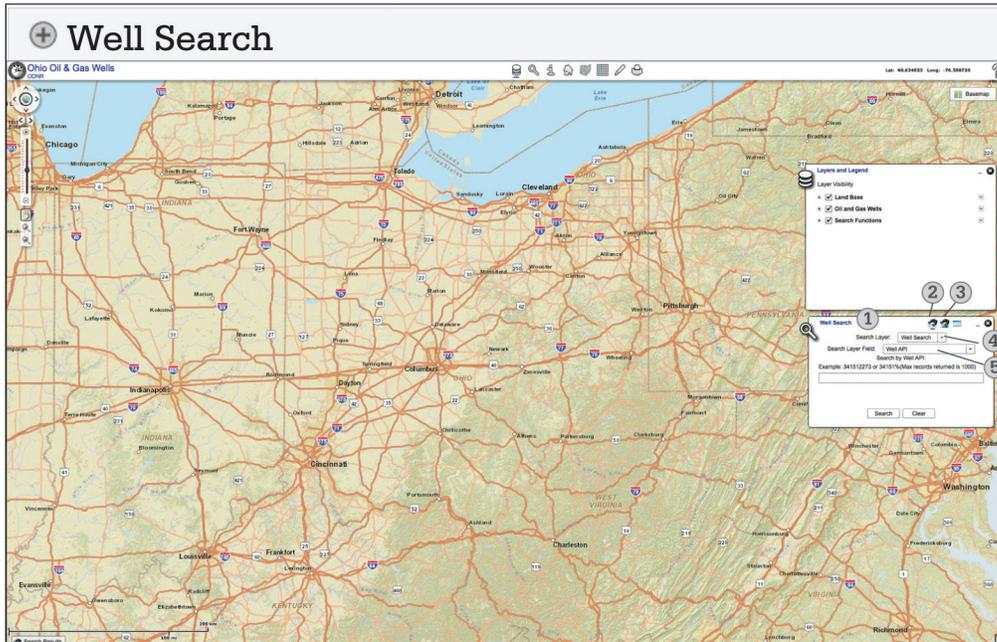

2. BASE MAP

The base map feature allows for three types of views: aerial (2), street (3), and topographical (4). The viewer defaults to the street view when opened, but can be changed to a different view through the base map palette (1).

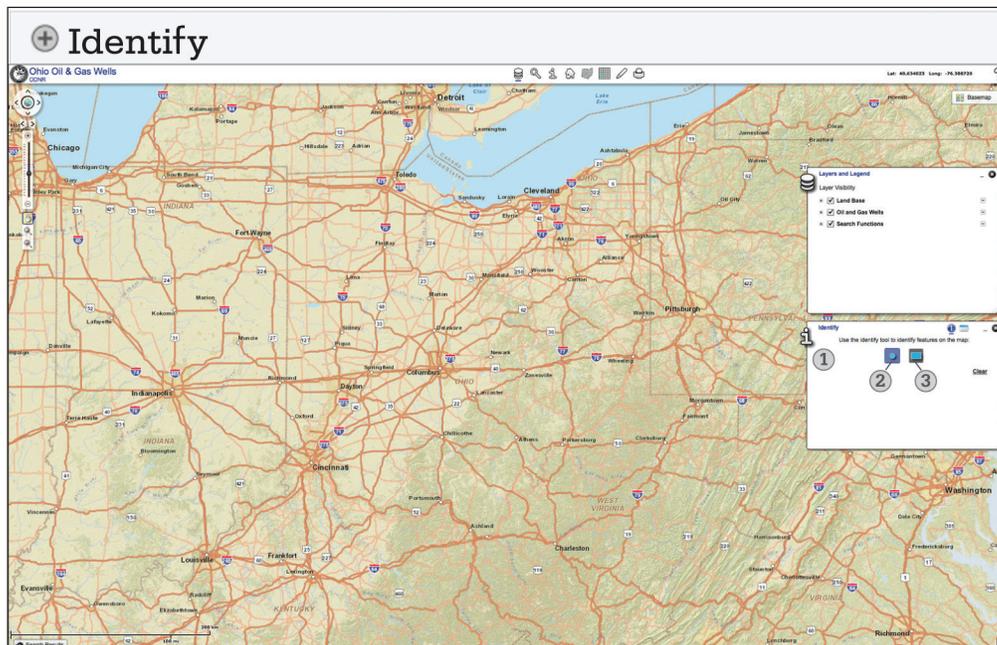

3. WELL SEARCH

The well search palette (1) allows for searches by either well or parcel (2). The layer field search (3) provides well search options including well API, well name, well company name, and company name or foundation. The layer field search provides options of PIN, statewide PIN, and parcel I.D. for parcel searches. All searches have the option of being queried through text entry (4) or spatial relation (5).

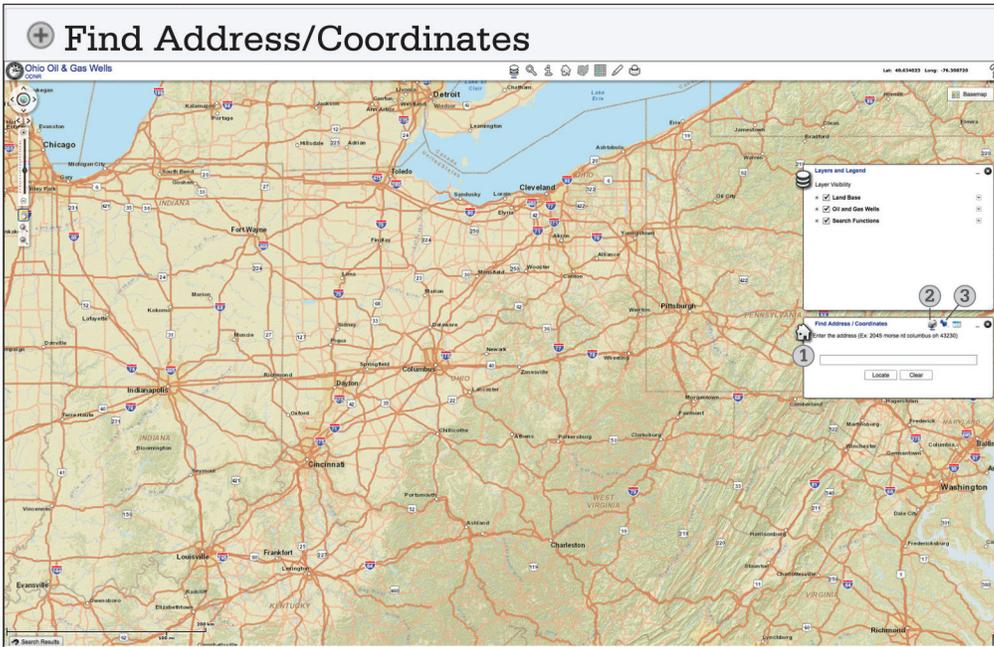

4. IDENTIFY

The identify palette (1) allows the user to identify features on the map by point (2) or rectangle (3) selection.

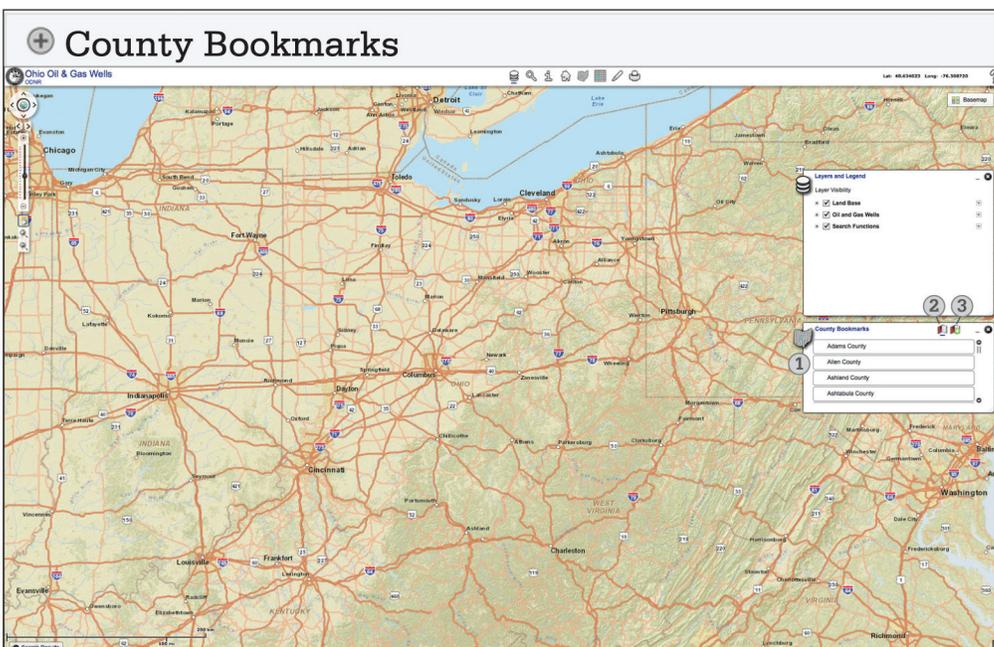

5. FIND ADDRESS/COORDINATES

The find address palette (1) allows for searches by address (2) or global positioning coordinates (3).

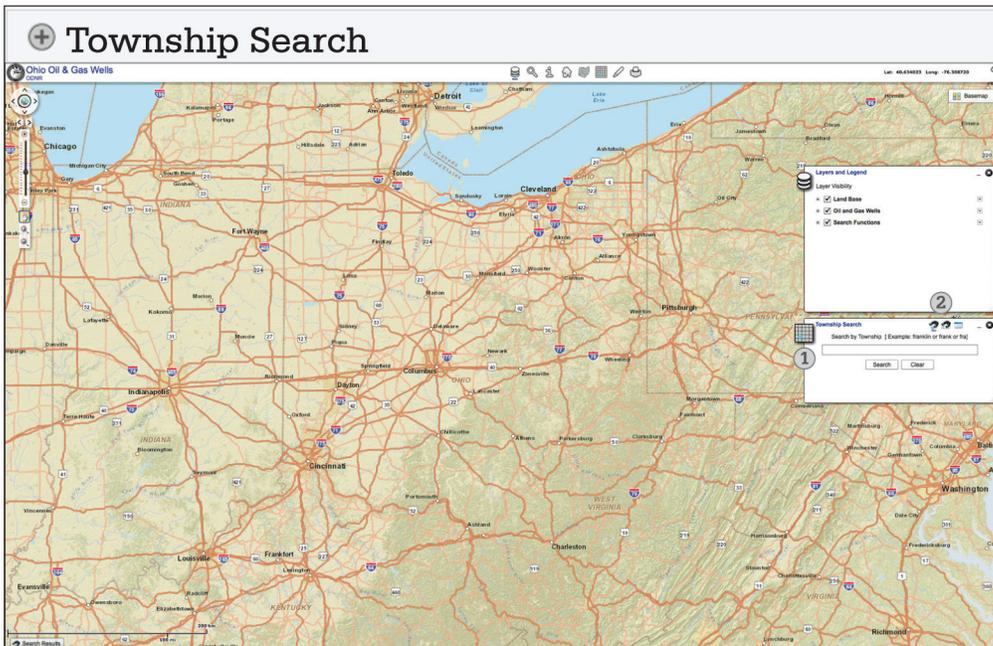

6. COUNTY BOOKMARKS

The county bookmarks palette (1) provides an alphabetical listing of counties (2) that are bookmarked for quick location. Bookmarks can also be added (3).

7. TOWNSHIP SEARCH

The township search palette (1) allows queries by township name. Results are listed by township and related county in Ohio. Searches are available by text or spatial search options (2).

8. DRAW & MEASURE

The draw and measure palette (1) provides six options to draw and define areas on the map: by point, line, rectangle, circle, ellipse, or polygon. The option of adding text is also available. Area and distance fields are provided within most drawing options to define measurements of the selected areas. Style options are also provided, including fill, outline, and opacity (alpha).
